

SOLIDWORKS automation service

BIZ-015 / REV A / 2026.09.01

Turn a repeatable CAD task into a controlled tool with explicit inputs, rules and verifiable outputs.

STATUS	Starting Point
CLASSIFICATION	BIZ
MATERIAL	WEB / CREATIVE
DISPOSITION	PUBLIC / STARTING POINT
CATEGORY	Website / Business / Creative
RECORD TYPE	project

GOAL

Run the first test described in this guide and record the result for solidworks automation service.

SOURCE STATE

New reference guidance; not a recovered test result

METHOD / STEPS

1. Observe the manual workflow and collect representative examples, exceptions and the installed SOLIDWORKS version.
2. Write an input/output specification and identify file ownership, property rules and actions that may overwrite data.
3. Implement and test on disposable copies, including missing properties, configurations, suppressed components and reruns.
4. Deliver the tool, setup instructions, supported-version statement, recovery path and a short acceptance demonstration.

THINGS TO WATCH FOR

Do not sell employer-owned code or data without rights to do so. Never claim the existing R&S tools are a public product from their names alone.

FIRST TEST / WHAT TO RECORD

Acceptance compares output to a known manual result and confirms a second run does not duplicate or damage it.

RESULT / WHERE THIS STANDS

Acceptance compares output to a known manual result and confirms a second run does not duplicate or damage it.

TROUBLESHOOTING

- Do not sell employer-owned code or data without rights to do so. Never claim the existing R&S tools are a public product from their names alone.

SPECIFICATION

CATEGORY	Website / Business / Creative
TYPE	PROJECT
PUBLIC BOUNDARY	Safe summary only
NEXT CHECK	Test the public workflow

DEVELOPMENT HISTORY

2026.09.01 / Rev A

Imported as an independent manifest record; public copy keeps uncertainty visible.
