

MIRACO Plus comparison

CAD-024 / REV A / 2026.09.01

Evaluate MIRACO Plus as an all-in-one scanning workflow, with its onboard interaction and additional photogrammetric capabilities checked against the actual job.

STATUS	Concept
CLASSIFICATION	CAD
MATERIAL	CAD / AUTOMATION
DISPOSITION	PUBLIC / CONCEPT
CATEGORY	CAD / Scanning / Automation
RECORD TYPE	how-to

GOAL

Run the first test described in this guide and record the result for miraco plus comparison.

SOURCE STATE

New reference guidance; not a recovered test result

EQUIPMENT

- CAD / automation tool
- Representative test model
- Measurement or inspection method

METHOD / STEPS

1. List whether avoiding a separate acquisition computer is a primary requirement.
2. Compare the exact Plus configuration, included targets/accessories and supported near/far workflow against the object sizes.
3. Request sample data from a similar matte, reflective or feature-poor part, including alignment of both sides.
4. Check export, calibration, battery workflow and downstream CAD work separately before comparing total cost.

THINGS TO WATCH FOR

Do not substitute MIRACO or MIRACO Pro specifications for Plus. A manufacturer's best-case accuracy is not a guarantee on every surface or full reconstructed part.

FIRST TEST / WHAT TO RECORD

The comparison records demonstrated workflow and export quality, with dated prices only if actually checked.

RESULT / WHERE THIS STANDS

The comparison records demonstrated workflow and export quality, with dated prices only if actually checked.

TROUBLESHOOTING

- Do not substitute MIRACO or MIRACO Pro specifications for Plus. A manufacturer's best-case accuracy is not a guarantee on every surface or full reconstructed part.

SPECIFICATION

TOOL PATH	CAD / automation tool
DELIVERABLE	HOW-TO
VALIDATION	Representative model / known dimension
STATUS	Concept

DEVELOPMENT HISTORY

2026.09.01 / Rev A

Imported as an independent manifest record; public copy keeps uncertainty visible.
