TECHNICAL NOTES

Conversation-specific knowledge extracted from the 3d cartoon character design discussion.

CONVERSATION / QUESTION AND CONTEXT

Can you turn this into a 3d cartoon character with isometric view and lighting

CONVERSATION / EXTRACTED GUIDANCE

1. What object? (e.g., the full character bust, a keychain, a coin, a badge, a hat-only mini, etc.)
2. Target size (mm), thicknesses, and any fit/tolerances (press-fit pegs, holes, etc.)
3. Your printer/nozzle (for wall thicknesses), preferred layer height, and material
4. Any design flourishes (logos, text, bevels/fillets, rounded vs. sharp)
5. Size: ~120 mm tall overall; scales cleanly up or down.
6. Suggested layer height: 0.16-0.28 mm; walls ≥ 2 perimeters.
7. Infill: 10-15% is plenty (it's a solid bust on a plinth).
8. Supports: Only "touching build plate" if your slicer flags the hat brim edges; otherwise it should print fine without.
