| RECORD TYPE    | build-thread                            |

## TECHNICAL NOTES

Conversation-specific knowledge extracted from the 3d model clamp mount discussion.

## CONVERSATION / QUESTION AND CONTEXT

I am wanting to make one of these. What all info do I need, or is there a 3d model available somewhere

## CONVERSATION / EXTRACTED GUIDANCE

- 
- It clamps around the 1.0" diameter bull barrel [embedded media omitted]
- Made from anodized aluminum [embedded media omitted]
- Uses two screws to squeeze halves together (no drilling) [embedded media omitted]
- Provides a MIL-STD-1913 Picatinny rail interface for lights/lasers [embedded media omitted]
- Barrel OD -> 1.000" (confirm yours!)
- Distance from barrel center -> trigger guard clearance
- Length between front sight + frame (this limits rail length)

## SPECIFICATION

|          |                         |
|----------|-------------------------|
| SOURCE   | Supplied ChatGPT export |
