

3D printed door stop price

CHAT-0029 / REV EXPORT-03 / 2025.10.03

A conversation-specific public summary of 3d printed door stop price, distilled from the supplied export. The detailed excerpts remain available in the released note file.

STATUS	RECOVERED / SPECIFIC NOTE
CLASSIFICATION	SYS
MATERIAL	CHAT EXPORT / BUILD & TOOLS
DISPOSITION	PUBLIC CONVERSATION EXCERPTS / REDACTED
CATEGORY	Build & Tools
RECORD TYPE	build-thread

TECHNICAL NOTES

Conversation-specific knowledge extracted from the 3d printed door stop price discussion.

CONVERSATION / QUESTION AND CONTEXT

My office is asking me to make them some door stops with my 3d printer. How would I go about giving them a fair price for them

CONVERSATION / EXTRACTED GUIDANCE

-
- Filament used: Weigh or estimate how many grams each door stop takes.
- Filament price: Divide your spool cost by grams per spool.
- Example: \$25 for 1 kg spool -> \$0.025 per gram.
- If one door stop is 50 g -> \$1.25 material cost.
- Electricity: 3D printers don't use much (often ~\$0.05-\$0.10 per hour).
- Machine wear & tear: Many people add \$1-2 per print for maintenance/depreciation.
- Slicer/prep time: Factor in your time setting up, removing supports, sanding, etc.

SPECIFICATION

SOURCE	Supplied ChatGPT export
CATEGORY	Build & Tools
CONVERSATION	3 user turns / 3 assistant turns
ATTACHMENTS	3 references detected
PUBLIC DETAIL	Extracted knowledge + excerpts

DEVELOPMENT HISTORY

2025.10.03 / EXPORT-04

Matched to the supplied export; key guidance is surfaced separately and the raw transcript remains unpublished.
