

3D-printed koozie fixture

CHAT-0055 / REV EXPORT-03 / 2026.07.14

A conversation-specific public summary of 3d-printed koozie fixture, distilled from the supplied export. The detailed excerpts remain available in the released note file.

STATUS	RECOVERED / SPECIFIC NOTE
CLASSIFICATION	SYS
MATERIAL	CHAT EXPORT / BUILD & TOOLS
DISPOSITION	PUBLIC CONVERSATION EXCERPTS / REDACTED
CATEGORY	Build & Tools
RECORD TYPE	build-thread

TECHNICAL NOTES

Conversation-specific knowledge extracted from the 3d-printed koozie fixture discussion.

CONVERSATION / QUESTION AND CONTEXT

What is this

CONVERSATION / EXTRACTED GUIDANCE

1. The flat base is where the leather koozie lays.
2. The raised lip/ledge along one side keeps the bottom edge of the koozie aligned.
3. The adjustable bar with three screws in slots lets you tighten or loosen the clamp for slightly different koozie sizes.
4. The threaded metal table in the background looks like a laser engraver or marking machine bed, so this jig is likely used to hold the koozie perfectly still while it's engraved.
5. 5 inches tall
6. 3 inches wide
7. About 1/2-3/4 inch thick overall.
8. Use captured hex nuts instead of threading into plastic.

SPECIFICATION

SOURCE	Supplied ChatGPT export
