RECORD TYPE	build-thread

TECHNICAL NOTES

Conversation-specific knowledge extracted from the approval drawing request discussion.

CONVERSATION / QUESTION AND CONTEXT

I am trying to create an approval drawing of a shuttle type conveyor with a 10" wide belt, made mainly of stainless steel angle and 10 ga stainless. I have the quote sheet you can read through as needed. the important dimensions are the infeed at 40" and the discharge at 55" those are top of belt elevations. I want the first 80" of the covneyor to be the frame and complete conveyor in retracted position. the conveyor fully extended at 60 inches becomes 140" long I have attached the quote sheet and a side view dket...

CONVERSATION / EXTRACTED GUIDANCE

1. Core specs (belt width, materials, stroke, elevations)
2. Retracted vs extended lengths (80" -> 140")
3. Belt path description based on your sketch (center drive, take-up + end pulley on rails, etc.)
4. Pulled in your Excel data as a table (as much as could be read cleanly)
5. --
6. A clean side view graphic (matching your sketch exactly - yours has critical belt routing logic)
7. Dimensioned pulley locations (A, B, C positions)
8. Rail travel callouts (take-up + end pulley stroke)

SPECIFICATION

SOURCE	Supplied ChatGPT export
CATEGORY	Build & Tools
CONVERSATION	3 user turns / 2 assistant turns
ATTACHMENTS	7 references detected
PUBLIC DETAIL	Extracted knowledge + excerpts

DEVELOPMENT HISTORY

2026.04.23 / EXPORT-04

Matched to the supplied export; key guidance is surfaced separately and the raw transcript remains unpublished.
