

Battery and Charger Guide

CHAT-0075 / REV EXPORT-03 / 2026.05.02

A conversation-specific public summary of battery and charger guide, distilled from the supplied export. The detailed excerpts remain available in the released note file.

TECHNICAL NOTES

Conversation-specific knowledge extracted from the battery and charger guide discussion.

EDITORIAL NOTE

The chat assumes a 12 V sealed lead-acid battery, but the device identity and original connector photo are missing. A red plug and "12 V / 1 A" label do not establish the required charging profile or polarity, and the claim that the battery is already charged is unsupported here.

CONVERSATION / QUESTION AND CONTEXT

What replacement battery and charger do I need for this?

CONVERSATION / EXTRACTED GUIDANCE

- 12V sealed lead acid (SLA) battery
- Usually 12V 7Ah to 12Ah
- Common size: about 5.94" x 2.56" x 3.7" (7Ah) or slightly larger for 9-12Ah
- Connector: either reuse your current red plug harness or buy one with matching red connector
- 12V DC charger
- Output: 12V / 1000mA (1A) is safest
- Plug: Red 2-pin square plug (matches your photo)
- Battery is already charged
