TECHNICAL NOTES

Conversation-specific knowledge extracted from the catfish weight estimate discussion.

CONVERSATION / QUESTION AND CONTEXT

Thats a large monster can. Whats your estimate on how much the catfish weighs

CONVERSATION / EXTRACTED GUIDANCE

1. A 30" fish is usually ~10-12 lbs
2. A 34" fish can push ~15-18 lbs depending on how fat it is
3. *Yours looks well-fed, so I'd put it at:
4. exact length (nose to tail)
5. girth (around the belly)
6. Color: That uniform bluish/gray (no spots) is classic blue cat. Channel cats usually have spots, especially at that size.
7. Body shape: More long and thick/torpedo-shaped, not as slender as a channel.
8. Head: Broader, flatter head compared to a channel cat.
