Create a .DXF that is 4" wide and 2" tall that has the text 25-0097-W01 cut out in it with a stencil font

CONVERSATION / EXTRACTED GUIDANCE

1. It seems that the necessary library for creating DXF files is not available in this environment.
2. However, you can easily generate the DXF file on your local machine using a Python script with libraries such as `ezdxf` or `pyautocad`.
3. Would you like a script to run on your own machine to generate the DXF file with the specified text cut-out?
