TECHNICAL NOTES

Conversation-specific knowledge extracted from the dxf waterjet sign design discussion.

CONVERSATION / QUESTION AND CONTEXT

I need a DXF of a sign that we need to cut on the waterjet that is 13.75" tall x 20" wide that says "The ONeills's" I want the text rotated slightly counter clockwise maybe 15 to 20 degrees

CONVERSATION / EXTRACTED GUIDANCE

1. *Specifications used:
2. Overall sign size: 20.000" wide × 13.750" tall
3. Text: "The ONeill's" (without the extra "s" after the apostrophe)
4. Rotation: 18° counterclockwise
5. Bold sans-serif lettering
6. Centered within the sign area
7. *[[document] The_ONeills_Sign_20x13_75.dxf](sandbox:/mnt/data/The_ONeills_Sign_20x13_75.dxf)
8. The file I generated uses vector outlines derived from a font, but it's intended as a proof-of-concept. Depending on your CAM software, you may want cleaner spline/polyline geometry.
