CONVERSATION / EXTRACTED GUIDANCE

1. If you scanned it with the regular Camera app: Samsung usually doesn't keep a QR-code scan history. But if you tapped the link that popped up, it should be in your browser history.
2. If it opened in Chrome: Open Chrome -> [more] -> History. Look around the time you scanned it.
3. If it opened in Samsung Internet: Open Samsung Internet -> [menu] -> History.
4. If you used Google Lens: Open the Google app -> profile picture -> Search history. Lens activity may show up there.
5. If the QR code came from a photo/screenshot: We can also find the original image in your Gallery and scan it again.
