

Fishing Lure Wire Use

CHAT-0176 / REV EXPORT-03 / 2026.07.13

A conversation-specific public summary of fishing lure wire use, distilled from the supplied export. The detailed excerpts remain available in the released note file.

STATUS	RECOVERED / SPECIFIC NOTE
CLASSIFICATION	EXP
MATERIAL	CHAT EXPORT / FIELD & NATURE
DISPOSITION	PUBLIC CONVERSATION EXCERPTS / REDACTED
CATEGORY	Field & Nature
RECORD TYPE	field-thread

TECHNICAL NOTES

Conversation-specific knowledge extracted from the fishing lure wire use discussion.

CONVERSATION / QUESTION AND CONTEXT

Csn i use this for my fishing lures

CONVERSATION / EXTRACTED GUIDANCE

- [yes] Armatures/internal harnesses - It can work if you need a simple internal support.
- [yes] Spinnerbait or buzzbait frames - 20 gauge is a bit thin but usable for small finesse spinnerbaits.
- [yes] Hook keepers - It works well.
- [warning] Line-through lures - It may be too flexible for larger fish like the big blue cats you're targeting.
- [no] Through-wire swimbaits or glide baits - I would not use 20 gauge. It will bend too easily.
- 20 gauge - Small panfish, bass finesse lures, internal retainers.
- 18 gauge - Better all-around for medium bass lures.
- 16 gauge stainless steel - Best for larger lures or anything that could hook into big fish. Much stronger and won't rust.

SPECIFICATION

SOURCE	Supplied ChatGPT export
CATEGORY	Field & Nature
CONVERSATION	1 user turns / 1 assistant turns
ATTACHMENTS	6 references detected
