TECHNICAL NOTES

Conversation-specific knowledge extracted from the multicolor printing methods discussion.

CONVERSATION / QUESTION AND CONTEXT

So my new printer is the creator 5 pro. It can print with 4 colors. How do you make thibgs with different colors

CONVERSATION / EXTRACTED GUIDANCE

1. Paint an existing STL in the slicer. Import a normal single-color STL, select Color Painting, and paint areas different colors. This is great for things like raised lettering, eyes, logos, patterns, or details on a figurine. FlashForge's multicolor workflow supports painting directly in the slicer....
2. Design separate parts for each color. This is usually the best method when you design your own models in FreeCAD/SolidWorks. For example, if you make a fishing lure with a black body, red gills, white eyes, and black pupils, you model those as separate bodies/components, export them together, and a...
3. Download a pre-colored 3MF. Unlike an STL, a 3MF can contain multiple parts and color/material assignments. You open it, map its colors to your four loaded filament slots, slice, and print. FlashForge specifically supports importing multicolor 3MF models and assigning their colors. [embedded media...
