RECORD TYPE	build-thread

TECHNICAL NOTES

Conversation-specific knowledge extracted from the power setup for printers discussion.

CONVERSATION / QUESTION AND CONTEXT

I have 2 3d printers adventure 5m and the creator 5 will be here soon. Im wanting to turn a closet into a print area by making a table that fills the whole distance. The only problem is I have no power outlets in the closet. Is there a surge protector or battery back up you recommend with a 10-15 ft cord that could handle them both

CONVERSATION / EXTRACTED GUIDANCE

1. *Straight answer:
2. *A battery backup (UPS) big enough for both printers is usually overkill, expensive, and may overload unless you buy a serious unit. For most print closets, a heavy-duty surge protector + proper extension strategy is the better move. Use UPS mainly if you want enough time to pause/cancel during out...
3. 12-gauge or 14-gauge heavy-duty extension (10-15 ft)
4. 15A minimum / 1875W rated
5. Flat plug helps in closets
6. Surge protection + breaker
7. Avoid cheap skinny cords
8. Creator 5 especially may deserve its own UPS due to higher power swings

SPECIFICATION

SOURCE	Supplied ChatGPT export
CATEGORY	Build & Tools
CONVERSATION	3 user turns / 3 assistant turns
ATTACHMENTS	3 references detected
PUBLIC DETAIL	Extracted knowledge + excerpts

DEVELOPMENT HISTORY

2026.05.09 / EXPORT-04

Matched to the supplied export; key guidance is surfaced separately and the raw transcript remains unpublished.
