

Two-color printing guide

CHAT-0388 / REV EXPORT-03 / 2026.07.24

A conversation-specific public summary of two-color printing guide, distilled from the supplied export. The detailed excerpts remain available in the released note file.

STATUS	RECOVERED / SPECIFIC NOTE
CLASSIFICATION	SYS
MATERIAL	CHAT EXPORT / BUILD & TOOLS
DISPOSITION	PUBLIC CONVERSATION EXCERPTS / REDACTED
CATEGORY	Build & Tools
RECORD TYPE	build-thread

TECHNICAL NOTES

Conversation-specific knowledge extracted from the two-color printing guide discussion.

CONVERSATION / QUESTION AND CONTEXT

how do i print this in 2 colors

CONVERSATION / EXTRACTED GUIDANCE

1. Load both filament colors into the printer first.
2. Once both colors appear under Filament, select the die.
3. Look at the top toolbar. The tool you want is the Color Painting / Paint tool. Depending on the FlashForge Studio version, it may appear as a paint bucket/painting icon after the object is selected.
4. Open Color Painting and select Filament 2 as your paint color.
5. Use the Fill or Smart Fill painting method and click inside each recessed dot. Because the pips are separate recessed surfaces, you should be able to fill each circular depression without manually brushing every triangle.
6. Rotate the die and paint all the pips on all six sides with Filament 2. Leave the rest assigned to Filament 1.
7. Click Slice plate, then go to Preview. Change the preview coloring to Filament if necessary. You should see the cube in Color 1 and the dots in Color 2.
8. 1 - Black PLA

SPECIFICATION

SOURCE	Supplied ChatGPT export
CATEGORY	Build & Tools
CONVERSATION	4 user turns / 8 assistant turns
ATTACHMENTS	68 references detected
PUBLIC DETAIL	Extracted knowledge + excerpts

DEVELOPMENT HISTORY

2026.07.24 / EXPORT-04

Matched to the supplied export; key guidance is surfaced separately and the raw transcript remains unpublished.
