

Kitchen Article Backlog

DAT-0018 / REV B / 2026.06.20

This began as a list of twelve kitchen projects awaiting fuller recipes. The archive now has coverage for all twelve topics across thirteen pages because blackened and smoked chicken have separate records. Twelve of those pages have complete companion cards added on September 15, 2026; the drumstick page already has a measured recipe. Some cards organize recovered quantities, while others supply a clearly labeled new measured version. The links below replace the stale claim that none of the topics has a recipe. They do not establish that every original batch was recovered or tested successfully.

STATUS	RECIPE COVERAGE / LINKED INDEX
CLASSIFICATION	DAT
MATERIAL	KITCHEN / INDEX
DISPOSITION	PUBLIC INDEX / EXISTING RECIPES + COMPANION CARDS
CATEGORY	Food & Recipes
RECORD TYPE	reference

TECHNICAL NOTES

The twelve kitchen leads now link to thirteen existing recipe pages, including the companion cards added on September 15. Original batch details and test results remain separate.

GOAL

Use the existing recipe coverage and record future batch observations against the correct version.

CONVERSATION / QUESTION AND CONTEXT

This is a coverage index, not a new recipe collection. Each linked page preserves its own recipe basis and limits.

CONVERSATION / EXTRACTED GUIDANCE

1. Summer sausage - FOOD-017: The current five-pound summer-style sausage card organizes the existing formula. It does not establish recovery of every earlier mustard-seed and cracked-pepper batch.
2. Thick filet mignon - FOOD-031: A newly assembled companion recipe completes the stovetop workflow; the measured batch is not a recovered test result.

3. Soft biscuits with grated butter - FOOD-032: The companion card organizes quantities already present in the existing method.
4. Non-sweet potato salad - FOOD-033: The companion card retains the existing measured method, with ingredient organization and chilling details added.
5. Sausage and potato casserole - FOOD-034: The companion card organizes the existing quantities and main cooking process, with completion and storage guidance.
6. Blackened chicken breasts - FOOD-035: The companion card preserves the measured seasoning blend and clarifies batch size and completion checks.
7. Smoked chicken breasts - FOOD-036: A new measured companion recipe completes the earlier unmeasured seasoning and smoking notes.
8. Corn on the cob without husks - FOOD-038: A new six-ear companion batch applies the existing smoking technique and moisture controls.
9. Pasta-salad seasoning - FOOD-039: The companion recipe builds on the measured dressing, with vegetables and seasoning amounts newly specified.
10. Grilled chicken drumsticks - FOOD-037: The existing record already contains the measured seasoning and indirect-to-direct grill workflow; it does not need a duplicate companion card.
11. Oven-cooked snow crab - FOOD-030: The companion card organizes the existing measured method and adds serving details.
12. Two boxed brownie mixes in a 9 x 13 pan - FOOD-040: A new companion recipe uses a named mix and its double-batch quantities. The unspecified original box brand has not been recovered.
13. Slow-cooker carne asada idea - FOOD-041: The linked citrus slow-cooker beef recipe organizes the existing measured method and serving quantities; it is not a claim of grilled carne asada or a confirmed test batch.

RESULT / WHERE THIS STANDS

All twelve original topic leads have linked recipe coverage. The original batch identity, photographs, adjustments, and results still need to be recorded where missing.

SPECIFICATION

ORIGINAL TOPIC LEADS	12 kitchen topics / 13 linked recipe pages
COMPANION COVERAGE	12 pages with recipe cards added September 15, 2026
ALREADY COMPLETE	FOOD-037 / measured drumstick recipe in the existing record
RECIPE PROVENANCE	Organized recovered quantities or clearly labeled new companion recipes
STILL USEFUL TO ADD	Actual batch photos, adjustments, and results tied to a recipe version

DEVELOPMENT HISTORY

2026.06.20 / Rev A

Added the broader cooking backlog so future recipes have a visible place in the archive.

2026.10.10 / B

Reconciled the old kitchen backlog with existing recipe coverage, including the September 15 companion cards. Added links without inventing recovered batches or test results.
