

Nicotine Jerky / Failed Safety Experiment

ERR-NICOTINE-JERKY-001 / REV IMPORT-01 / 2026.09.06

This record preserves the interesting part of the experiment-the attempt to turn a homemade jerky chew into a behavioral replacement for nicotine pouches-while marking the nicotine-food combination as a dead end. Concentrated nicotine can be dangerous in very small quantities, would not distribute reliably through a ground food mixture, and would be absorbed unpredictably. The edible jerky chew may remain a nicotine-free food experiment, but adding nicotine powder, liquid nicotine, or extract is not a public recipe or recommended path.

STATUS	ABANDONED
CLASSIFICATION	ERR
MATERIAL	JERKY / NICOTINE CONCEPT
DISPOSITION	DEPRECATED / SAFETY HOLD
CATEGORY	Food / Safety
RECORD TYPE	failed-experiment

TECHNICAL NOTES

A food-based nicotine-delivery idea that was abandoned because homemade dosing and absorption could not be controlled safely.

GOAL

Explore whether a familiar jerky-chew ritual could replace a nicotine pouch without creating an unsafe homemade dose.

EQUIPMENT

- Food grinder
- Food-safe storage container

MATERIALS

- Prepared jerky
- No nicotine additive

METHOD / STEPS

1. Keep any jerky-chew recipe nicotine-free.
2. Treat nicotine reduction as a separate, professionally dosed cessation discussion.
3. Do not mix concentrated nicotine products into food or estimate homemade doses by batch weight.

RESULT / WHERE THIS STANDS

Abandoned as a nicotine-delivery method. The nicotine-free jerky texture idea may be revisited independently.

TROUBLESHOOTING

- A uniform batch cannot guarantee a uniform nicotine portion.
- Mouth and swallowed absorption would vary from bite to bite.
- A tasty result does not make concentrated nicotine food-safe.

SAFETY / LIMITATIONS

- Do not add nicotine powder, liquid nicotine, or extracted nicotine to food.
- Keep concentrated nicotine away from children, pets, food preparation, and skin contact.
- Use established, labeled products and qualified health guidance for cessation support.

SPECIFICATION

ORIGINAL IDEA	Jerky chew combined with nicotine
FAILURE MODE	Uncontrolled dose and absorption
SAFE REMAINDER	Nicotine-free jerky chew concept
DISPOSITION	Moved to Graveyard

DEVELOPMENT HISTORY

2026.09.06 / IMPORT-01

Imported from the supplied shared chat and archived as a failed safety experiment; no nicotine dosing instructions are published.
