

Engineering Sticker Set / QR Code Failure

ERR-STICKER-QR-001 / REV IMPORT-01 / 2026.09.06

This record preserves the visual exploration: a warning-plate badge, the I Can Probably Make That slogan, a fishing identity, a cure-smoke-eat-repeat emblem, the Gnome Engineering Department, and a rebuild-modify-rebirth creature. Several QR treatments were attempted, including decorative modules and a center badge, but generated artwork could not guarantee a machine-readable code. The QR branch was abandoned; the sticker language remains useful for future print-ready artwork.

STATUS	ABANDONED
CLASSIFICATION	ERR
MATERIAL	VINYL STICKER / GENERATED ART
DISPOSITION	DEPRECATED / QR BRANCH ABANDONED
CATEGORY	Visual / Sticker Design
RECORD TYPE	failed-visual-experiment

TECHNICAL NOTES

A sticker collection built around Engineering Unwarranted, field humor, fishing, smoke-and-eat culture, gnome engineering, and a QR badge that never became reliably scannable.

GOAL

Build a coherent sticker family with a reliable QR path into the U225X record surface.

EQUIPMENT

- Image-generation workflow
- QR generator and camera scanner
- Sticker print or vinyl-cut service

MATERIALS

- Sticker artwork
- White vinyl or printable adhesive stock

METHOD / STEPS

1. Define a small visual family before generating variants.
2. Treat the QR code as a separate machine-readable asset, not as decorative artwork.
3. Test the QR at final print size under ordinary phone-camera lighting.
4. Keep exact-location details out of the public artwork unless they are deliberately cleared for publication.

RESULT / WHERE THIS STANDS

The sticker language worked; the embedded QR artwork did not pass reliable scan testing and was abandoned.

TROUBLESHOOTING

- Generated QR artwork can look convincing while encoding the wrong modules.
- A logo, badge, or texture in the center can break decoding without a controlled error-correction test.
- Use a real generated QR as a separate layer and verify it after export and after printing.

SAFETY / LIMITATIONS

- Do not imply that the decorative QR is functional until it scans repeatedly on multiple phones.
- Review artwork for private coordinates, personal details, and accidental third-party marks before public release.

SPECIFICATION

COLLECTION	Six-sticker visual system
THEMES	Engineering / fishing / smoke / gnome / rebuild
QR RESULT	Decorative only / not verified scannable
PUBLIC MEDIA	Safe reference images; exact coordinates omitted
DISPOSITION	Moved to Graveyard

DEVELOPMENT HISTORY

2026.09.06 / IMPORT-01

Imported from the supplied shared chat and sticker folder; the QR branch was archived after repeated scan failures.
