

Woodworking Logo Redesign

ERR-WOOD-LOGO-0410 / REV IMPORT-01 / 2026.09.06

The experiment tried to replace an electrical-looking element on the right side of an existing logo with a woodworking motif. The useful direction was a restrained wood-shaving curl or related shop symbol that could survive as a clean vector, print, CNC, or laser asset. The conversation never reached a verified final vector or production-ready export, so this branch is preserved as a failed experiment rather than presented as a finished design.

STATUS	ABANDONED
CLASSIFICATION	ERR
MATERIAL	LOGO CONCEPT / WOODWORKING GRAPHIC
DISPOSITION	GRAVEYARD / FAILED EXPERIMENT
CATEGORY	Visual / Logo Design
RECORD TYPE	failed-visual-experiment

TECHNICAL NOTES

A logo-redesign conversation that was abandoned before a clean final asset was delivered.

GOAL

Explore a woodworking replacement for one logo element without losing the original mark's balance.

EQUIPMENT

- Vector drawing application
- Clean source logo
- Print or laser test method

MATERIALS

- Original logo artwork
- Woodworking reference shapes

METHOD / STEPS

1. Start from a clean, rights-cleared source logo.
2. Replace only the targeted element with a simple woodworking form.
3. Check the mark at small print size and in one color.
4. Export vector and raster versions only after the final geometry is approved.

RESULT / WHERE THIS STANDS

No final production asset; archived as a useful but incomplete direction.

TROUBLESHOOTING

- A screenshot or rough generated preview is not a clean vector source.
- Too much detail disappears when a logo is reduced or cut.
- Changing one element can disturb the balance of the complete mark.

SAFETY / LIMITATIONS

- Confirm the source mark can legally be modified before restarting this experiment.

SPECIFICATION

GOAL	Replace an electrical visual cue with woodworking
BEST DIRECTION	Simple wood-shaving or shop-tool motif
EXPECTED OUTPUT	Clean vector plus print-ready raster
FINAL ASSET	Not delivered
DISPOSITION	Abandoned / Graveyard

DEVELOPMENT HISTORY

2026.09.06 / IMPORT-01

Imported as a separate failed experiment into a local public-safe record.

2026.09.06 / GRAVEYARD

Kept for history; no unfinished draft is represented as a final logo.
