TECHNICAL NOTES

Public-water fishing guide organized around observation, tactic, and current-condition checks.

GOAL

Make fishing notes repeatable without presenting historical conditions as current.

EQUIPMENT

- Rod and reel matched to the target species
- Hooks, line, sinkers, and landing tools
- Notebook or phone field log

MATERIALS

- Bait or lure identified in the next field log

METHOD / STEPS

1. Record the date, water, weather, and temperature.
2. Draw the rig and note bait and position.
3. Log current, snags, bites, and landed fish.
4. Separate what happened from what might work elsewhere.
5. Check current rules before fishing.

RESULT / WHERE THIS STANDS

Reference template for future field reports.

TROUBLESHOOTING

- If bites stop, vary depth before changing every part of the rig.
 - Separate a no-bite day from proof that the tactic cannot work.
 - Keep public location notes general and omit private access details.
-

SAFETY / LIMITATIONS

- Use public-access information and current regulations; do not publish private property details.
