

CAD Productivity Add-In

SYS-0023 / REV A / 2026.08.11

This personal software study explores a compact command surface for common CAD and drafting tasks: standardized document properties, model-view setup, drawing cleanup, export preparation, and reusable checks. The public record describes the architecture and lessons learned without exposing private source code, templates, paths, or organization-specific workflows.

STATUS	PROTOTYPE
CLASSIFICATION	SYS
MATERIAL	C# / DESKTOP UI
DISPOSITION	PROTOTYPE / SANITIZED

TECHNICAL NOTES

A focused desktop toolset for turning repetitive drafting actions into visible, repeatable commands.

SPECIFICATION

INTERFACE	Desktop command panel
INTEGRATION	CAD API concept
FOCUS	Repeatable drafting actions
RELEASE STATE	Public-safe summary

DEVELOPMENT HISTORY

2026.08.11 / Rev A

Separated reusable automation patterns from private implementation details.

RELEASED MATERIAL / SOURCE LINKS
