

Inspection Review Workflow

SYS-0027 / REV A / 2026.07.24

The inspection workflow separates annotation parsing from user approval. A future recreated example will cover common dimension and callout families, preview results, manual corrections, starting-number control, selected-sheet scope, and reversible clearing. The sample data will be fictional and independent of any customer drawing.

STATUS	PLANNED
CLASSIFICATION	SYS
MATERIAL	DRAWING / REVIEW
DISPOSITION	PLANNED / PUBLIC EXAMPLE

TECHNICAL NOTES

A preview-first workflow for finding, numbering, reviewing, and safely removing drawing callouts.

SPECIFICATION

INPUT	Sanitized drawing
MODES	Preview / apply / clear
REVIEW	Manual correction
DATA POLICY	Fictional sample

DEVELOPMENT HISTORY

2026.07.24 / Rev A

Defined the preview-before-apply behavior and safe demo boundary.

RELEASED MATERIAL / SOURCE LINKS

SYS-0027_review-flow.txt
WORKFLOW / 2 KB
Awaiting public upload.
