

CAD Automation Catalog

SYS-0029 / REV A / 2026.06.05

The catalog gathers the reusable subjects behind earlier automation work: missing-parameter checks, flat-pattern updates, property assignment, DXF export, view rotation, and synchronized manufacturing fields. It documents behaviors and lessons without private source or internal templates.

STATUS	REFERENCE
CLASSIFICATION	SYS
MATERIAL	CAD / AUTOMATION
DISPOSITION	PUBLIC-SAFE SUMMARY

TECHNICAL NOTES

A public-safe catalog of repeatable CAD actions, guarded updates, and export checks.

SPECIFICATION

FOCUS	Repeatable CAD actions
EXPORTS	DXF / drawing prep
SAFETY	Preview / backup / report
STATUS	Reference

DEVELOPMENT HISTORY

2026.06.05 / Rev A

Converted the legacy automation themes into a public-safe catalog.
